Inflation and stagflation targeting

It is proved that the policy unilaterally directed to decrease of the inflation rate makes negative impact on development of the real sector of economy. It is concluded that it's necessary to refuse of the inflation targeting mode realization by the Bank of Russia. The need of the state direct actions is reasoned directing to increase investments and other measures limiting negative impact on the economy of liberal actions of monetary institutes of the country.

Keywords: the inflation, inflation targeting, stagflation, economic growth, percent rate, floating exchange rate.
