**Break-even production complex of the penal system as a factor in its development**

The article discusses the work as a tool of education, correction, socialization and rehabilitation of prisoners. There are problems the prison industrial complex reference system, preventing education law-abiding citizen. Particular attention is paid to the influence of the break-even production complex penal system on the results of work of convicts.

Based on research, to provide a break-even production complex penal system, encouraged to capital-saving or capital-intensive technologies, manage the production arm of the economic system. In order to improve the organizational and economic mechanism of production complex notes the need to not only break-even in the productive sectors, but also the development of new methods of the corrective influence on convicted, new incentives for law-abiding behavior and active resocialization.

The penal system and the manufacturing sector should soon reach a new level of economic development, which will allow the structure to carry out the functions specified for it with the least use of budgetary funds, when the set of all basic social goals. The result should be an increase in the share of GDP attributable to the manufacturing sector MIS. Achieving such a result is possible with consolidation of production, capital intensity and the introduction of new and advanced technologies.

*Keywords:* the penal system, manufacturing complex, production activity, labor, breakeven, organizational and economic mechanism

**Pensions discharged service of employees as a factor of economic safety of the correctional system**

The essence of economic security of the correctional system is revealed, the necessity of its preservation in modern conditions is emphasized. The factors influencing economic security of this system are allocated. Provision of pensions of the employees dismissed from service is presented as a factor of economic security of correction system. It is proved that programs of social transformations countrywide, and, in particular, in correctional system are insufficiently coordinated with financial opportunities of the state (the federal budget), and rates of reforming in the social sphere is not always linked to real incomes. All this can have a negative impact on the socio-economic development of the country and as a consequence — to the economic security of the correctional system.

*Keywords:* economic security, economic security of the correctional system, social factors, dismissed from service staff pensions.

The efficiency of operator services through meet-companies

Outgoing (tour operators for outbound tourism), as the most difficult type of tour operating business implies the possibility of two schemes of arrangement: involving direct contact with suppliers of all travel services involved in the tourism package and tours with the participation of an intermediary — meet-company (foreign intermediaries, travel agencies). The complexity of the organization of work disappear in the organization of work of the operator via meet-the company. The disadvantages of cooperation autonomy and incoming tour operators in the organization of overseas tours is considered as the appreciation of offering service.
